**This competition is private-entry.** You've been invited to participate.

## Find Named Entities in Tweets!

The final project is to construct an NER tagger for Twitter. So far, we have used the kaggle competition:

<https://inclass.kaggle.com/c/umass-twitter-ner/>

to track teams' performance on a development set. The purpose of this kaggle competition is to perform evaluation on a test set, where we don't release the ground truth annotation.

See the previous kaggle competition and the instructions on the course webpage for additional details. The input data format and submission file format are the same as before.

**Started:** 1:53 pm, Monday 1 December 2014 UTC

**Ended:** 5:00 am, Thursday 4 December 2014 UTC (2 total days)

**Points:** this competition did not award ranking points

**Tiers:** this competition did not count towards tiers
